Subject: RE: zoonotic disease deliverable?

Hi Nathan,

You do have an FY13 deliverable listed in RMS listed under Task 2.2.1.2 (see below). David Diaz-Sanchez is the TL for that as well as the co-PL, so I am copying him here in case he has any additional info and so you can connect as needed regarding the status of this product.

I'd still like to see a webinar demo of HexSim to think about future potential linkages with C-FERST in 2.2.1.5, as we discussed previously. Let me know if you'd like to do that and I would be happy to help with the webinar url when we pick a date and time.

Thanks,
 Valerie

[Task] 2.2.1.2 Environmental factors related to key health outcomes

Subject: zoonotic disease deliverable?

Hi Valerie,

Hope your week's off to a good start. I had a quick question that I'd been meaning to ask you -- specifically, do I have a deliverable due for FY13? As I recall, I originally did have one, but we talked about possibly dropping it. I don't believe I ever got an update on its final status...

Thanks,

Nathan
